

Mobile Nitrogen Unit

Increased Safety and Productivity

MNU-30 MOBILE NITROGEN UNIT

The MNU-30 offers increased operator safety and decreased transformer servicing time. Cv International's truck or skid/trailer mounted Mobile Nitrogen Unit delivers high pressure, 99.9% pure nitrogen to substation transformers conveniently, quickly and safely.

The MNU-30 System (truck system shown) allows one person operation when servicing transformers and offers integrated safety features such as an ergonomically easy use control panel, regulators and check valves.

SNG-II

NITROGEN GENERATION

Keep the MNU-30 cylinders ready for service with the SNG-III, a fully integrated, electronically driven, turn-key nitrogen generating system capable of producing nitrogen gas up to 99.5% purity at 32.3 m3/hr (19.0 scfm) @ 5000 psig.

MODEL: MNU-30
Part Number: MNU-30

Nitrogen Capacity

No. of Cyl: 6
Cyl. Capacity: 380 cubic feet
Total System Capacity: 2280
