

## FOR IMMEDIATE RELEASE

### Cv International Wraps 2025 Vendor & Customer Summit - Celebrates Nationwide Attendance and Industry Partnership

**Bend, OR - 9/28/2025** Cv International successfully concluded its **September 16, 2025 Vendor & Customer Summit**, welcoming partners, customers and vendors from across the country for two days of product demonstrations, technical briefings, and collaborative networking. The event showcased Cv International's field-ready solutions and reinforced strategic relationships across the defense and renewable energy sectors.

*"We were pleased to host colleagues and customers from coast to coast," said Dan Warden, CEO, Cv International. "The Summit was a great opportunity to demonstrate our latest innovations, hear direct feedback from end users, and deepen partnerships that drive safer, more efficient field operations."*

#### Highlights

- **National attendance:** Representatives from operators, service providers and supply partners traveled from across the United States to participate in product demos, breakout sessions and hands-on displays.
- **Corporate recognition:** Cv International extends special thanks to Lockheed Martin and Northrop Grumman for their participation, their presence helped elevate technical discussions and collaboration opportunities.
- **Product showcases:** Attendees experienced live demonstrations and exhibits featuring Cv International offerings, including the MNG-4, WindKit, the Maintainer Series maintenance stands, and the full suite of nitrogen generation, booster and fill solutions.
- **Marketing and engagement:** Informative brochures, booth displays and technical collateral supported in-depth conversations about deployment, safety protocols and financing options.
- **Hospitality:** Summit attendees enjoyed a catered lunch and social events designed to foster relationship building and informal collaboration.

The Summit reinforced Cv International's commitment to delivering reliable, scalable equipment and services that meet demanding field requirements. Attendees provided actionable feedback that will inform ongoing product development and customer support initiatives.
